

Digital Foundational Skills Assessments

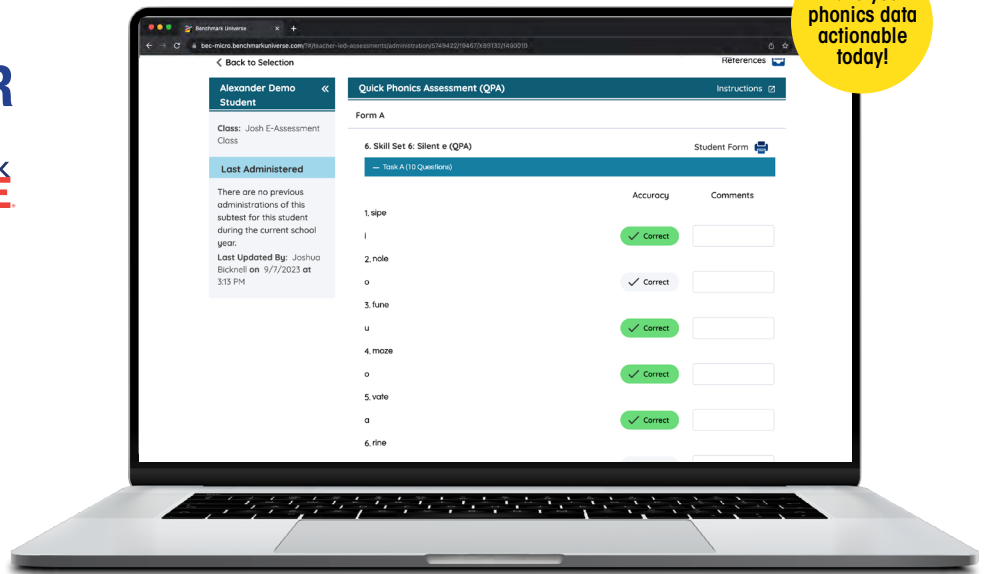

Target Instruction, Save Time, Make Placement Decisions

NOW AVAILABLE FOR

- > **Phonological & Phonemic Awareness Assessment**
- > **Quick Phonics Assessment**
- > **Quick Spelling Assessment**

We've made it easier than ever to capture your students' foundational skill performance and further support their needs with *Benchmark Advance* and *Adelante*.

What's Included?

Each assessment offers digital recording that makes it quick and easy to **complete screenings, monitor progress, and track student growth**. Use **reports** to uncover individual and small-group needs, as well as make **Tier II** and **Tier III*** instructional decisions.

Quick Phonics Assessment

Developed by **Jan Hasbrouck, Ph.D.**, these surveys are organized around related categories of phonics skills (e.g., vowel digraphs) and help determine which skills students have and have not mastered. These assessments aid in determining the starting point for instruction in *Benchmark Phonics Intervention*.*

Quick Spelling Assessment

Phonological & Phonemic Awareness Assessment

Developed by **Wiley Blevins, Ed.D.**, this assessment examines the range of phonological and phonemic awareness skills to determine which students need more intensive instruction and practice using the *Intensive Phonological and Phonemic Awareness Flip Chart* tools.

* *Benchmark Phonics Intervention* is also available for your Tier III needs beyond core instruction.
